To Whom It May Concern:

Wood Dale Electric Construction Inc. was a part of a successful renovation project for Rush Copley Medical Center at our free standing emergency center in Yorkville, IL. This project incorporated two new treatment rooms and replacing x-ray equipment, as well as other work. Working under the general contractor, Wood Dale Electric completed the electrical work as scheduled and coordinated with our Facilities team well. There were revisions late in the project and they were prompt in their response to make the necessary changes. We would not hesitate in having Wood Dale work on future projects.

Sincerely,

Bruce Meyer, AIA LEED AP

Project & Construction Coordinator

Rush Copley Medical Center
